

NEAR EAST UNIVERSITY

Department: Economics

Graduate School: Social Sciences

Program name: PhD in Economics

Program Language: English

Program Objective: The objective of the Economics PhD Program at Near East University is to enable students to gain a good career in the academic field, business world and government. In the program, the students are given the deepest Economics theories; in Microeconomics and Macroeconomics. In addition, students are provided to do empirical studies with their theoretical knowledge; by this way the students can learn how the economics theory can be put into numerical values. Students in the program are encouraged to write and publish their articles in internationally indexed journals, so that students can comprehend the science of Economics with an international perspective. With the comments from the referees of the international indexed journals, it is aimed to develop the thinking visions of the students as much as possible. In the Program both scientific and entrepreneurial developments are aimed.
